IDEAS

FILTER

CATEGORISE

mass vs class type
mass vs country
mass top 10

all about mass of meteorite

(1)

freq vs class type
freq vs year

(2)

density of HubDist
lat vs long

(3)

COMBINE & REFINER

3 categories answer broadly

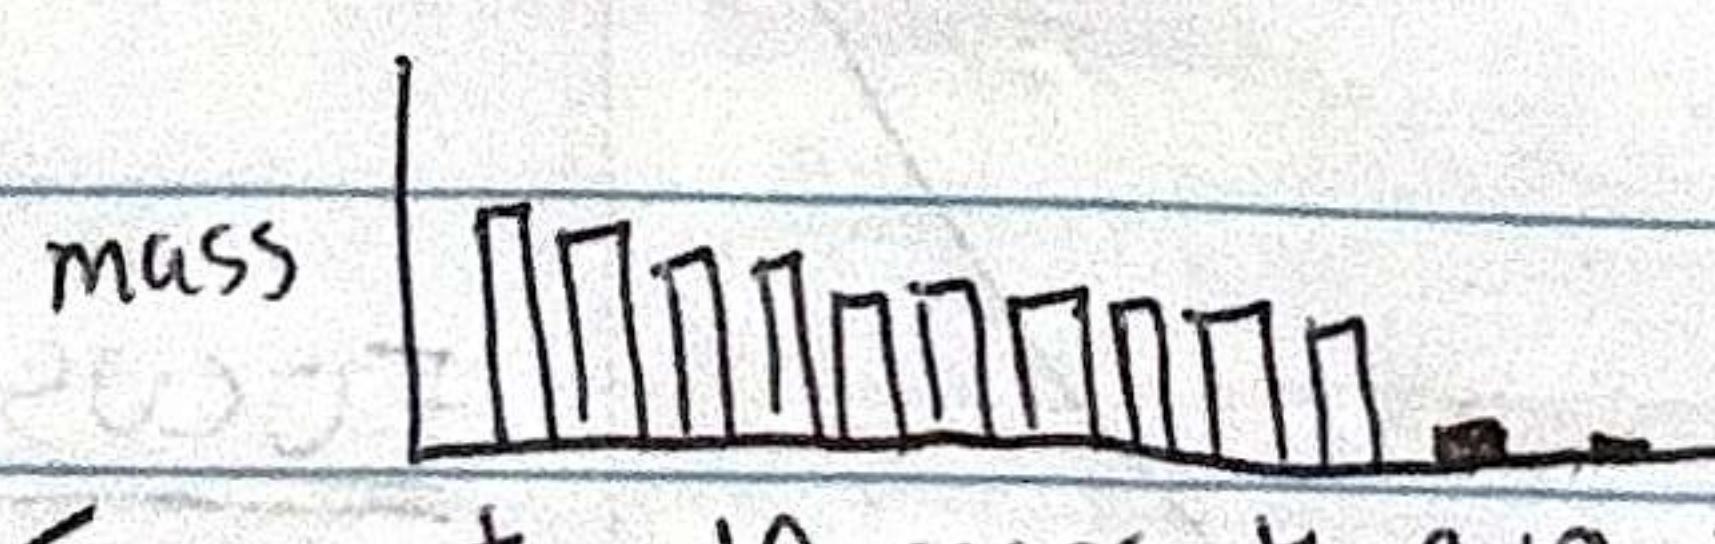

(1) how heavy are meteorites?

(2) how often do meteorites land on earth?

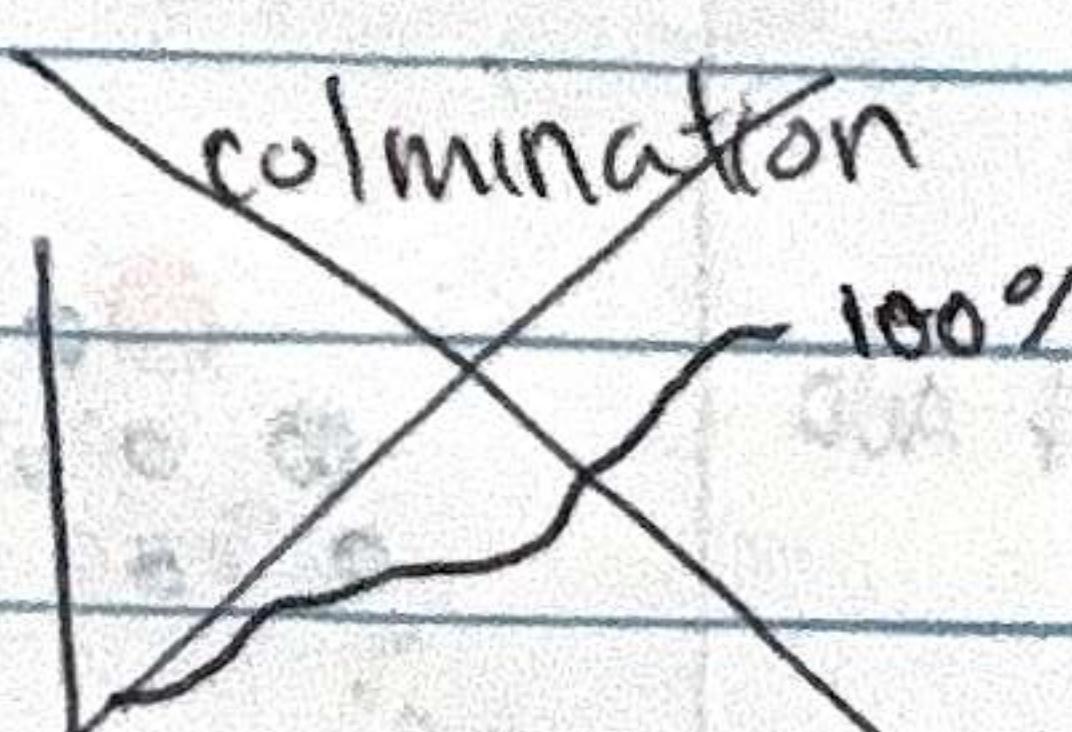

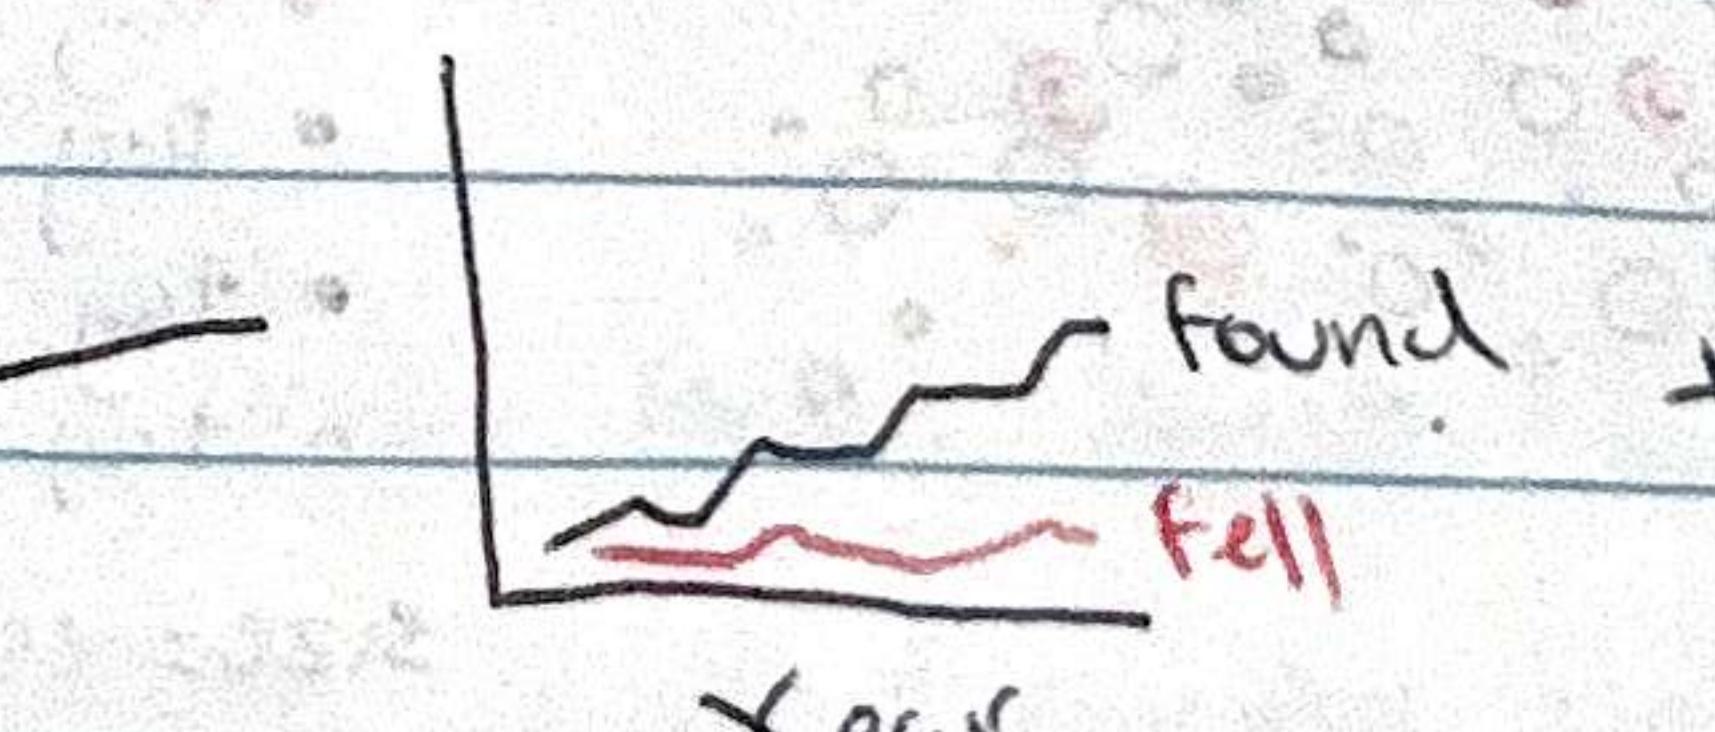

(3) where do meteorites land?

L in the world

L how far away from city/towns?

top 10 mass + avg + smallest?

can talk about any spikes

Daniel Tsung

iteration 1

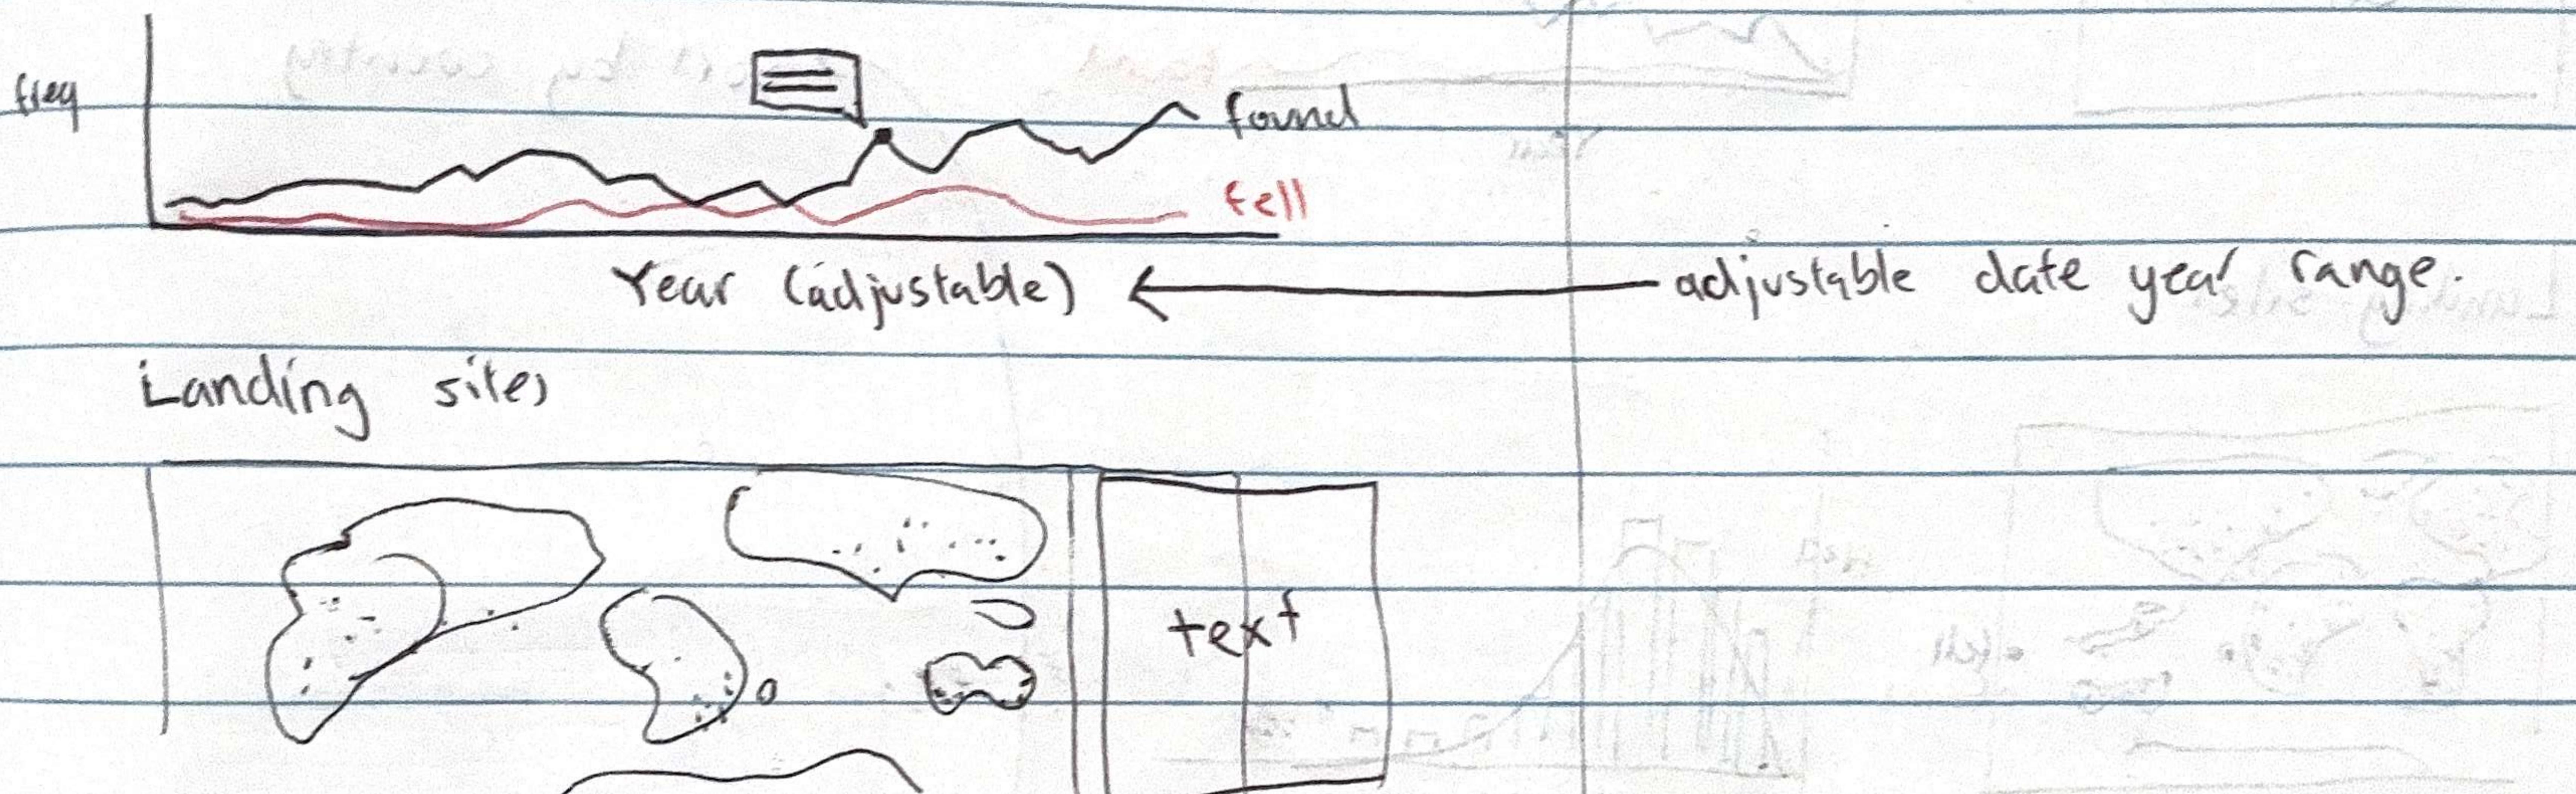

OPERATIONS

TITLE

What are meteorites? (Class type)

will you ever see one? (frequency)

FOCUS

top to bottom general idea/explanations
one text per chart.

charts are main focus, text boxes
small for easier reading

DISCUSSION

+ simple to understand and to code

- maybe not interesting enough

TITLE

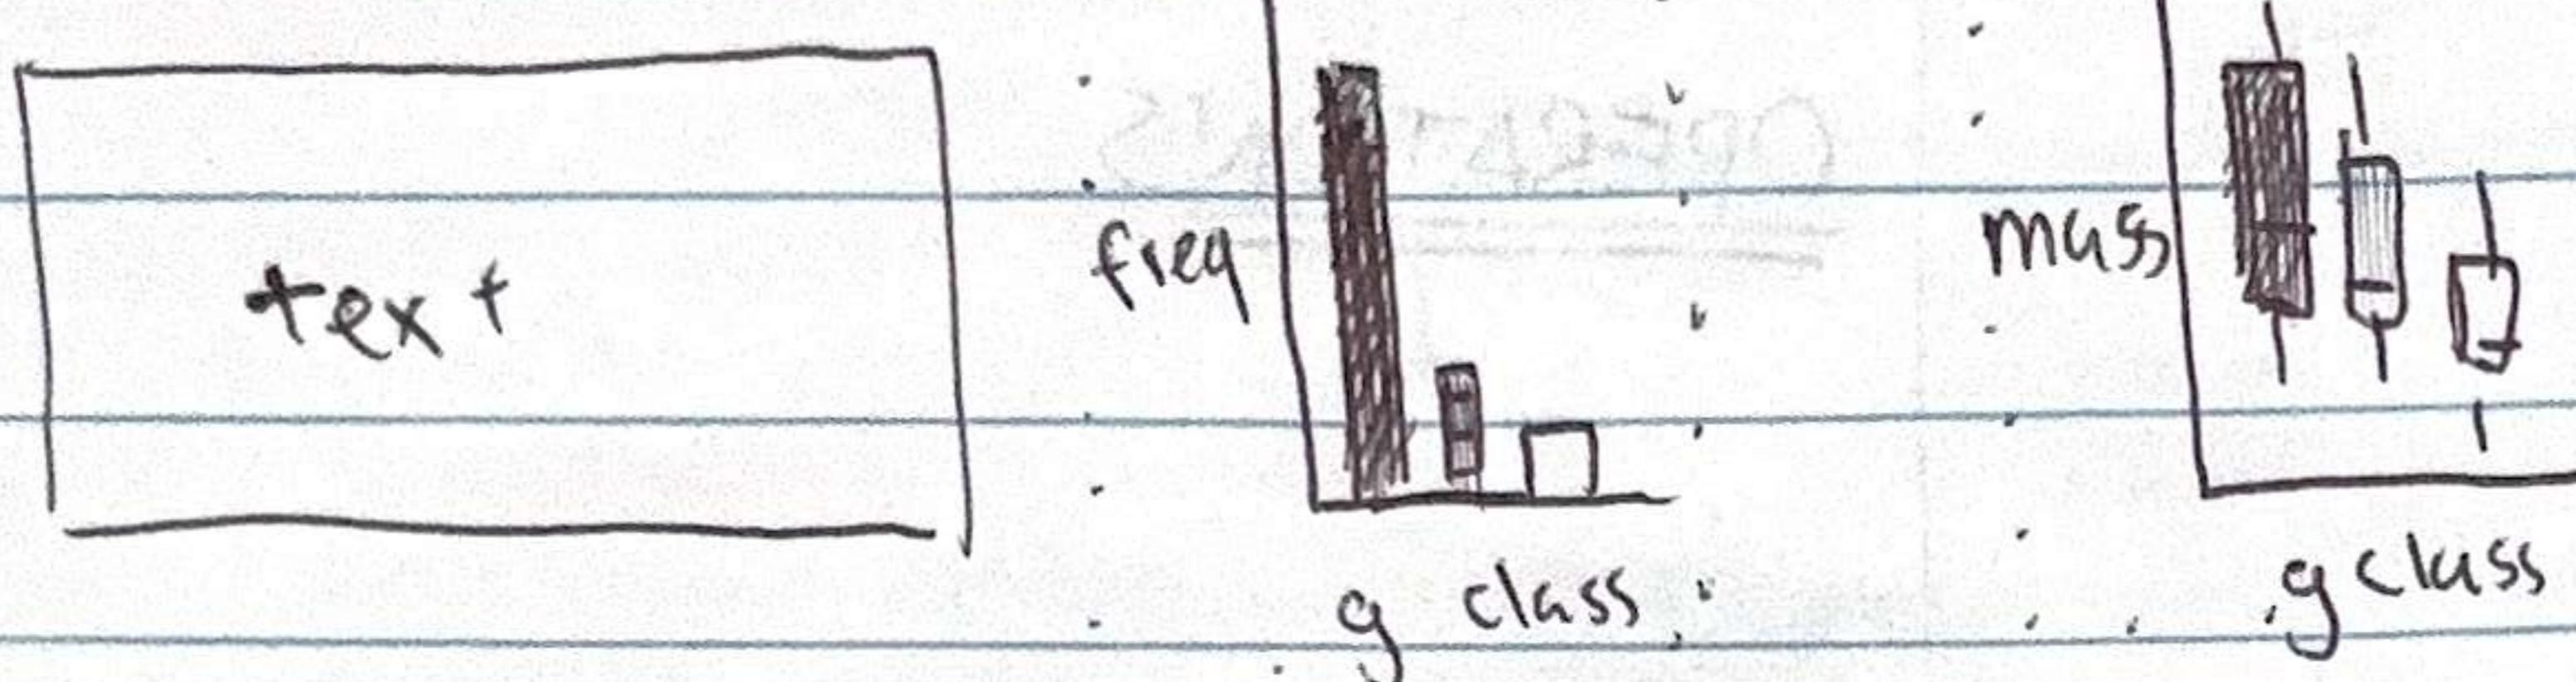

SHEET #3

Daniel Tsung

iteration 4

What are meteorites

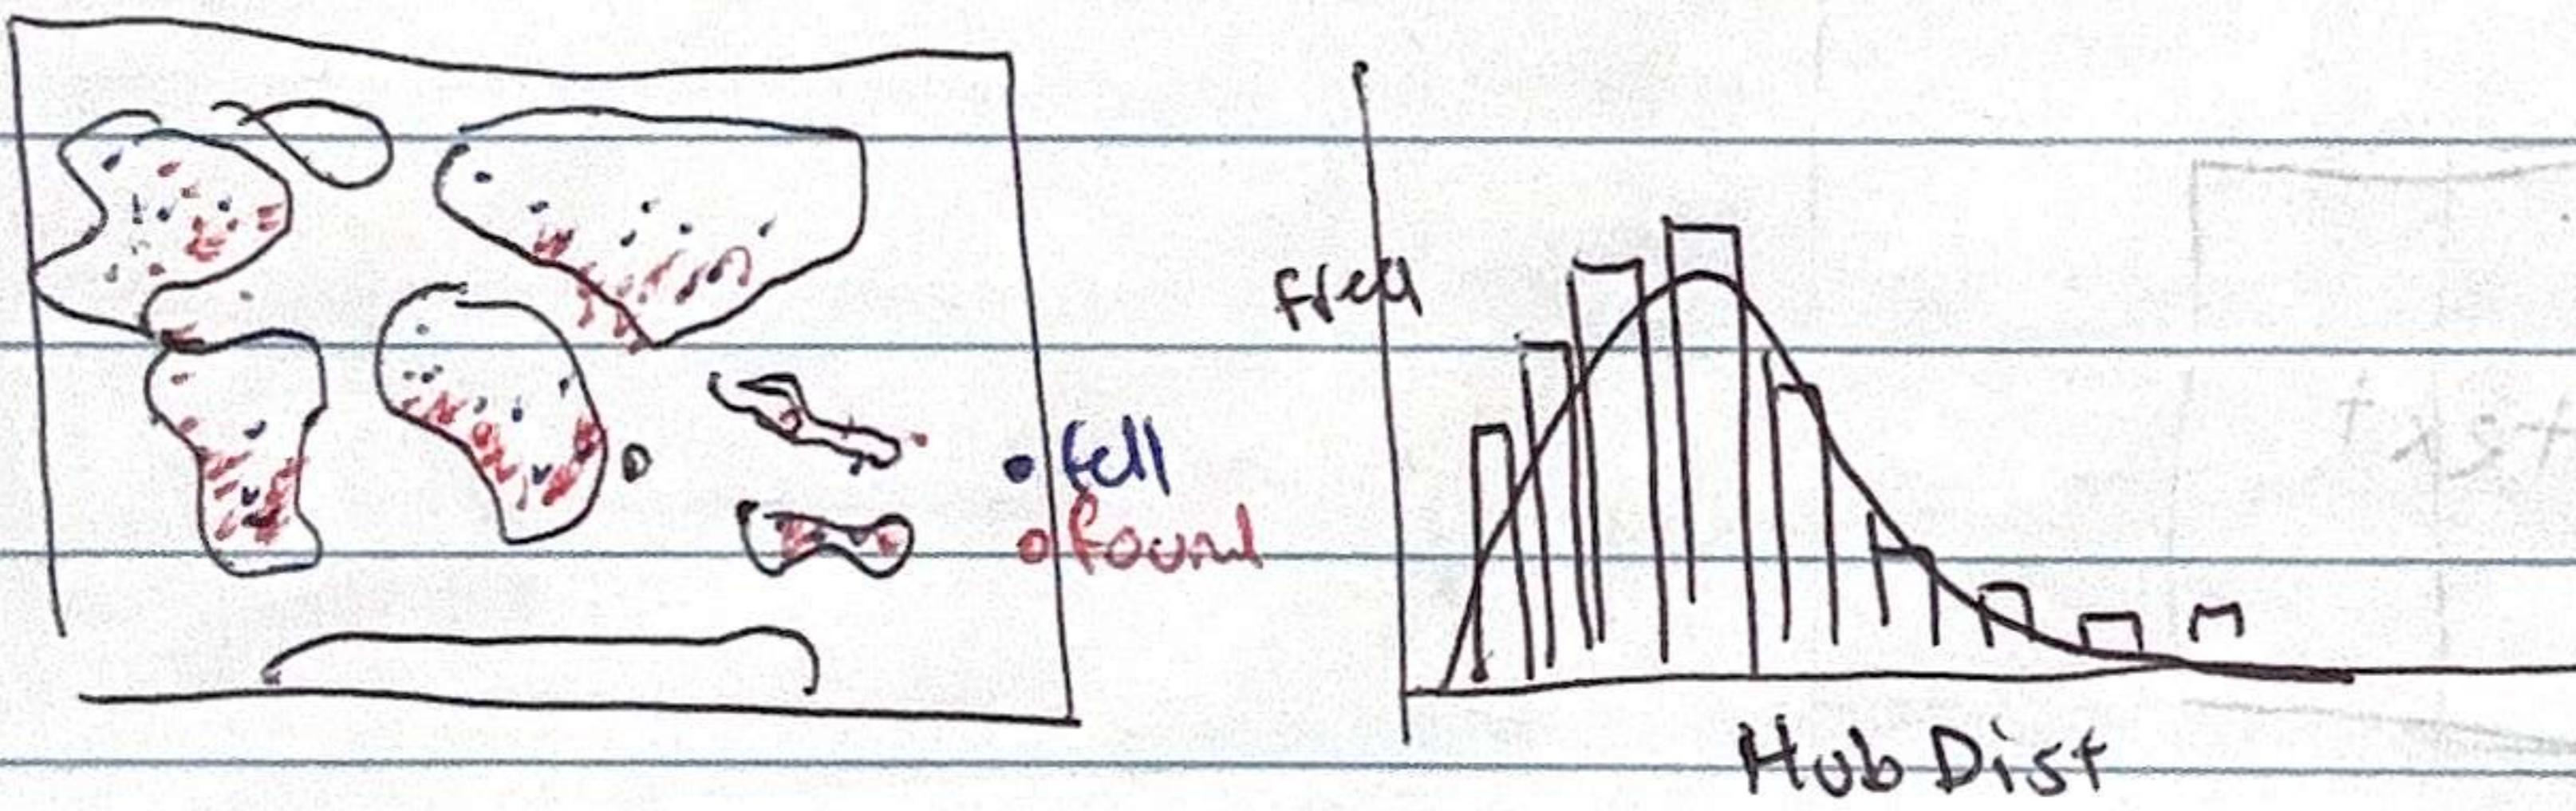

OPERATIONS

Will you ever see one?

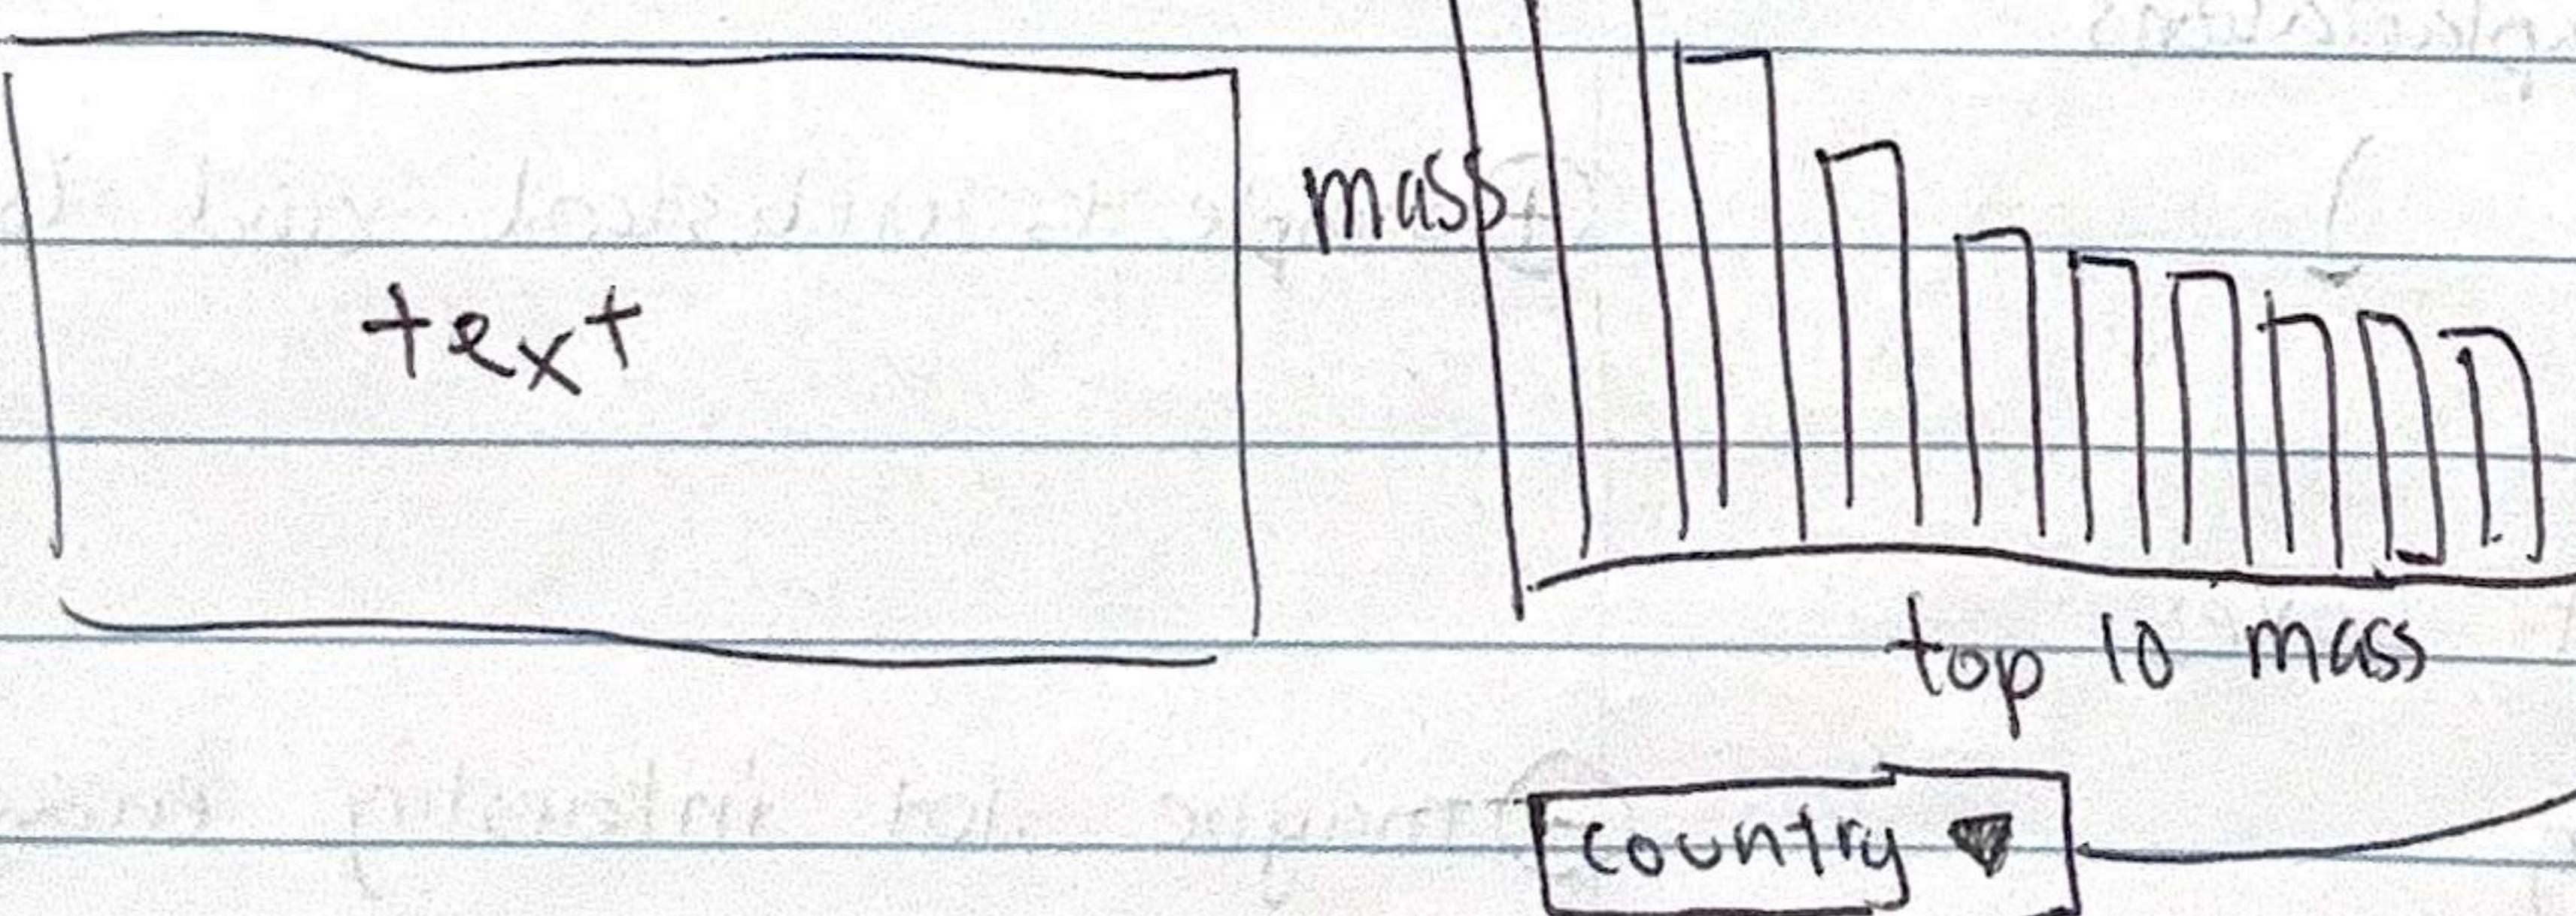

Landing sites

DISCUSSION

What if one knits on your head?

- + text boxes all on the left,
 - + simple to follow

FOCUS

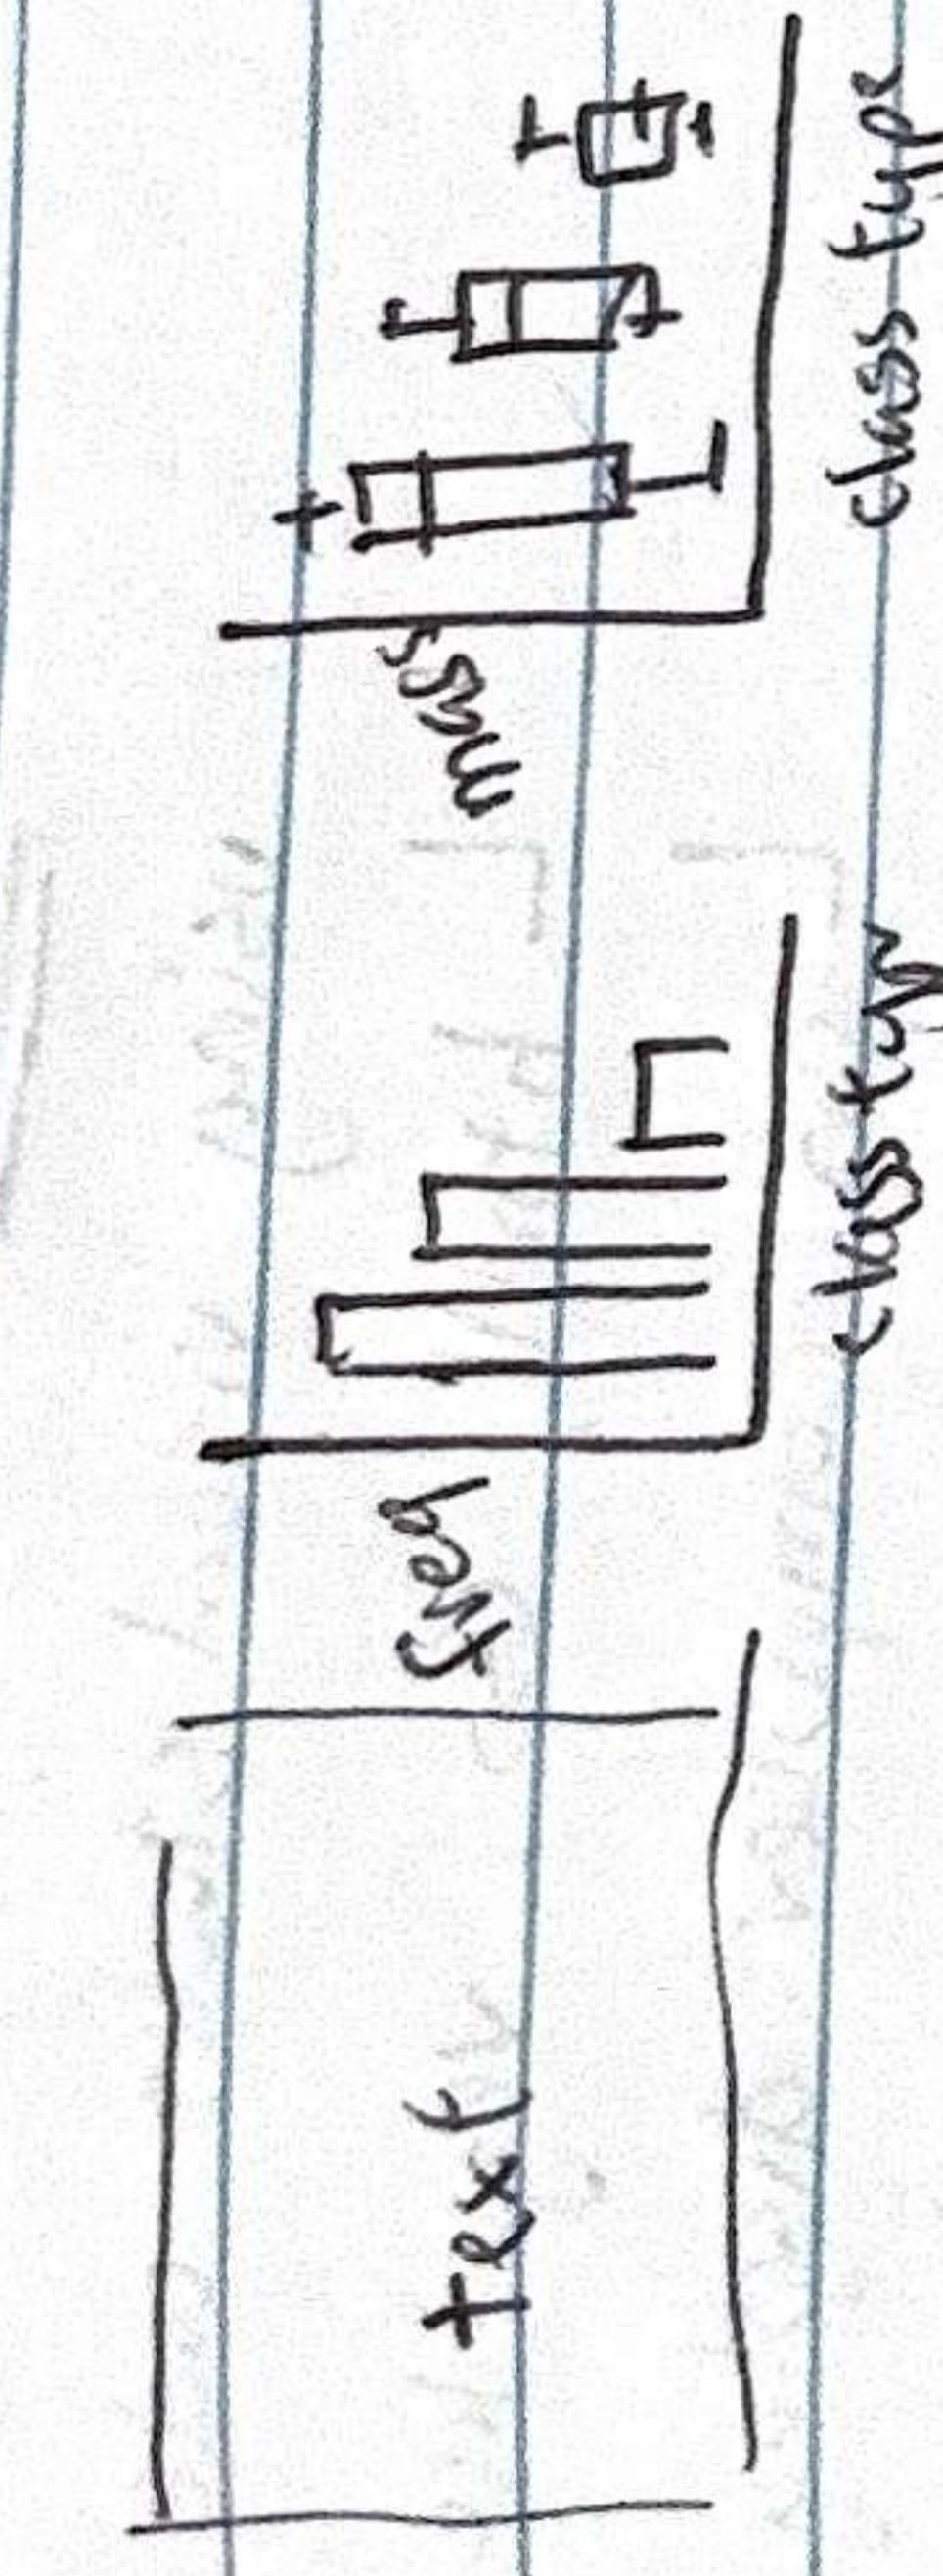

- layout is simple top to bottom
- Sectioned into rows and columns
- same colours for same information.

- ① might be too text focused.
 - ② not interesting?

LAYOUT

TITLE

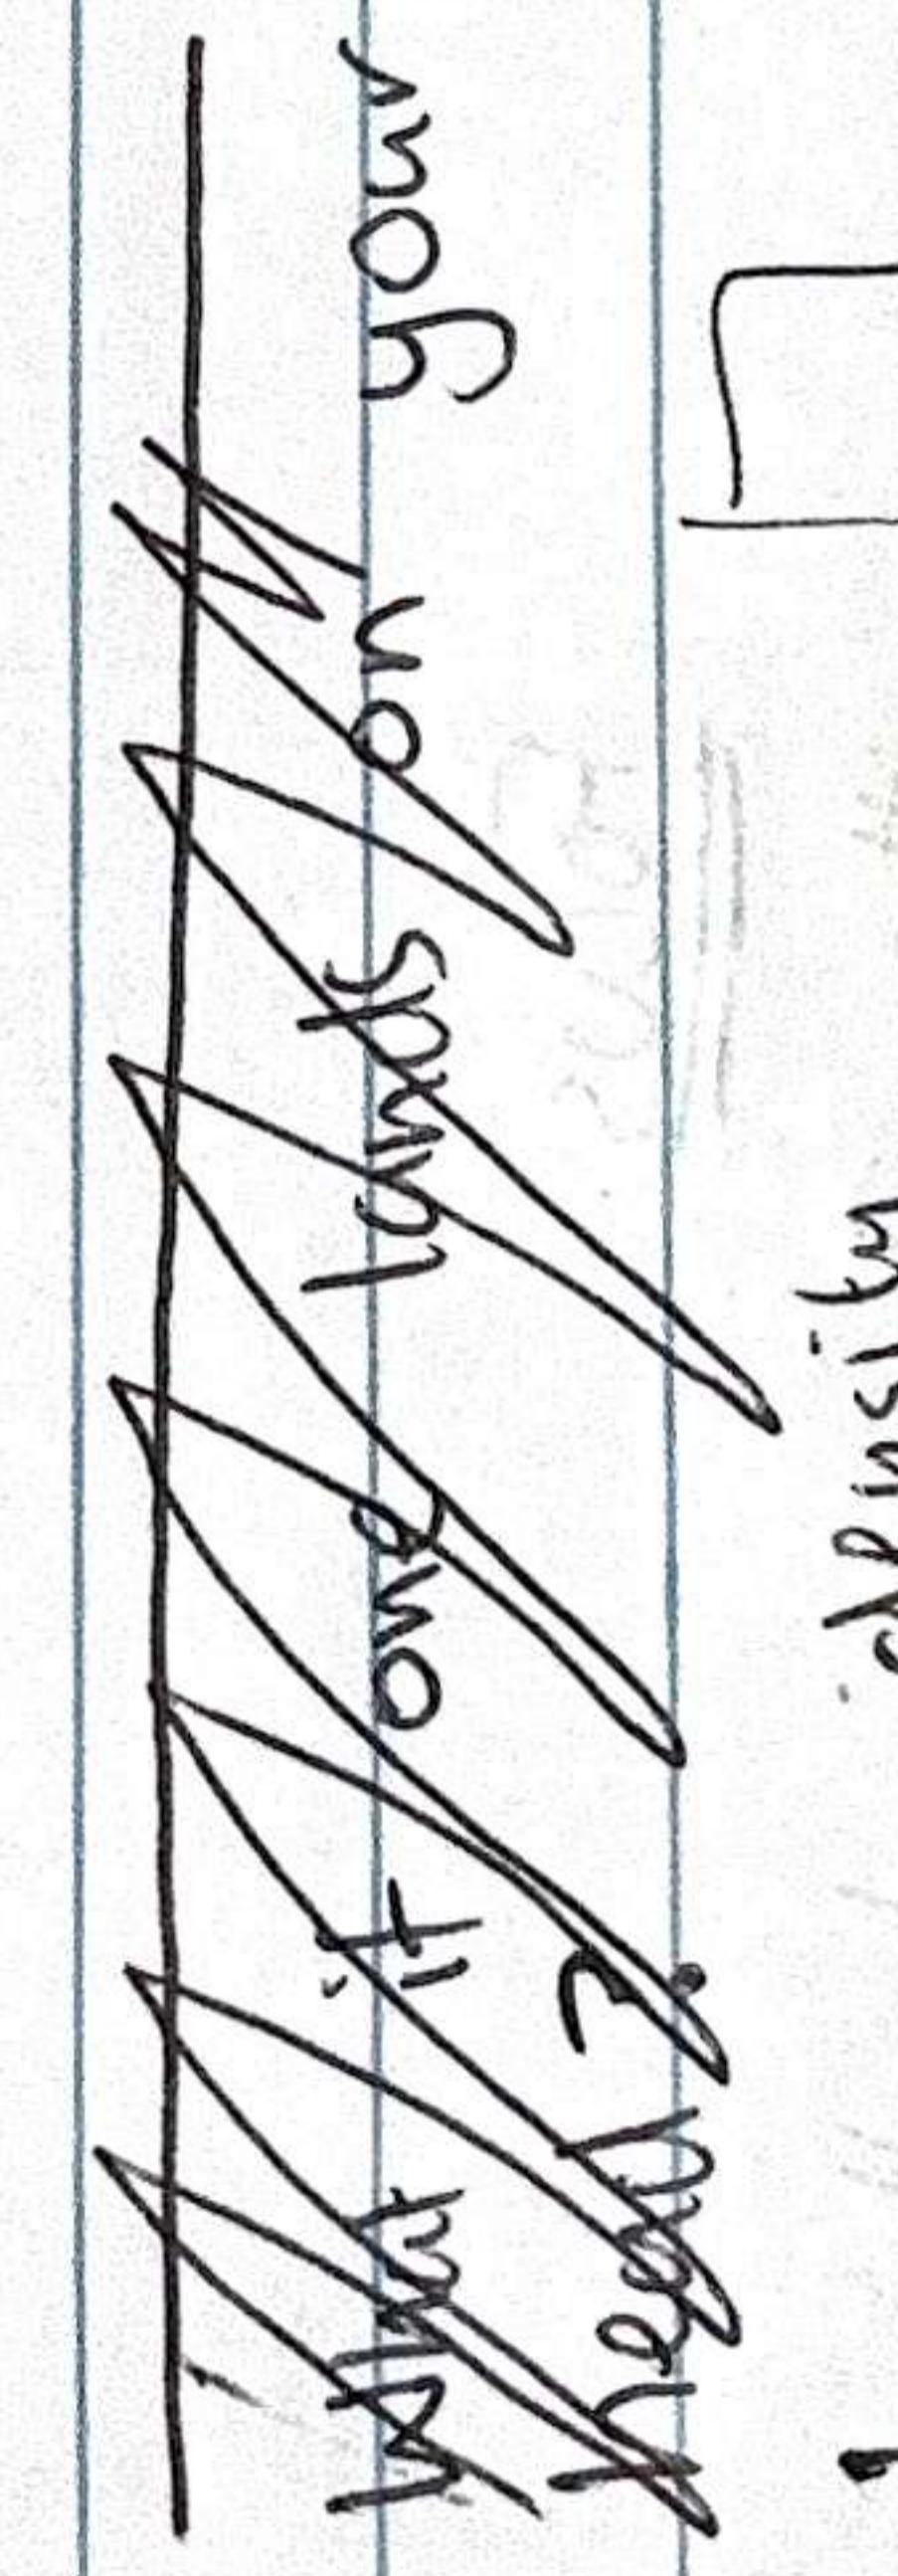

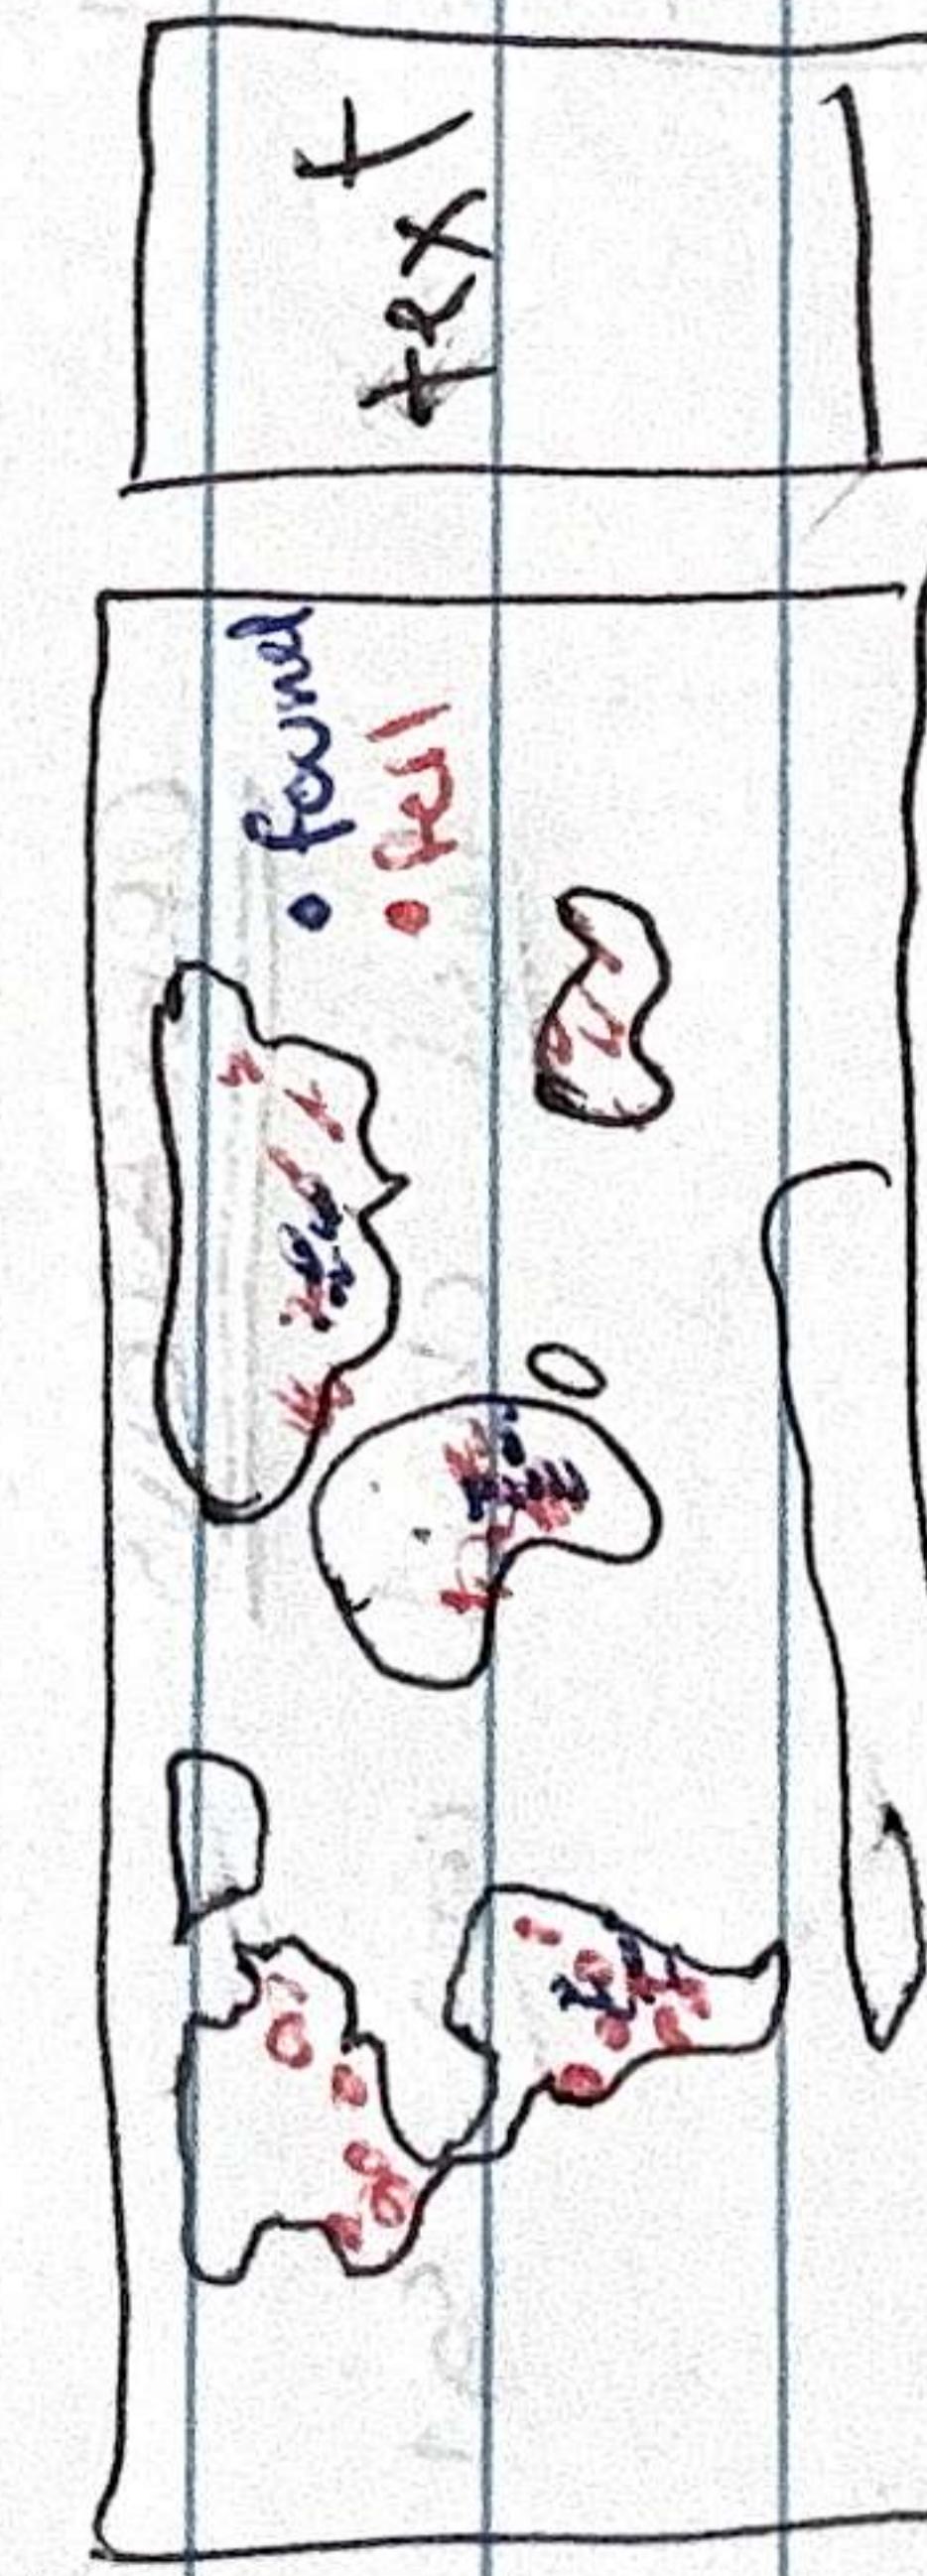

what are meteorites?

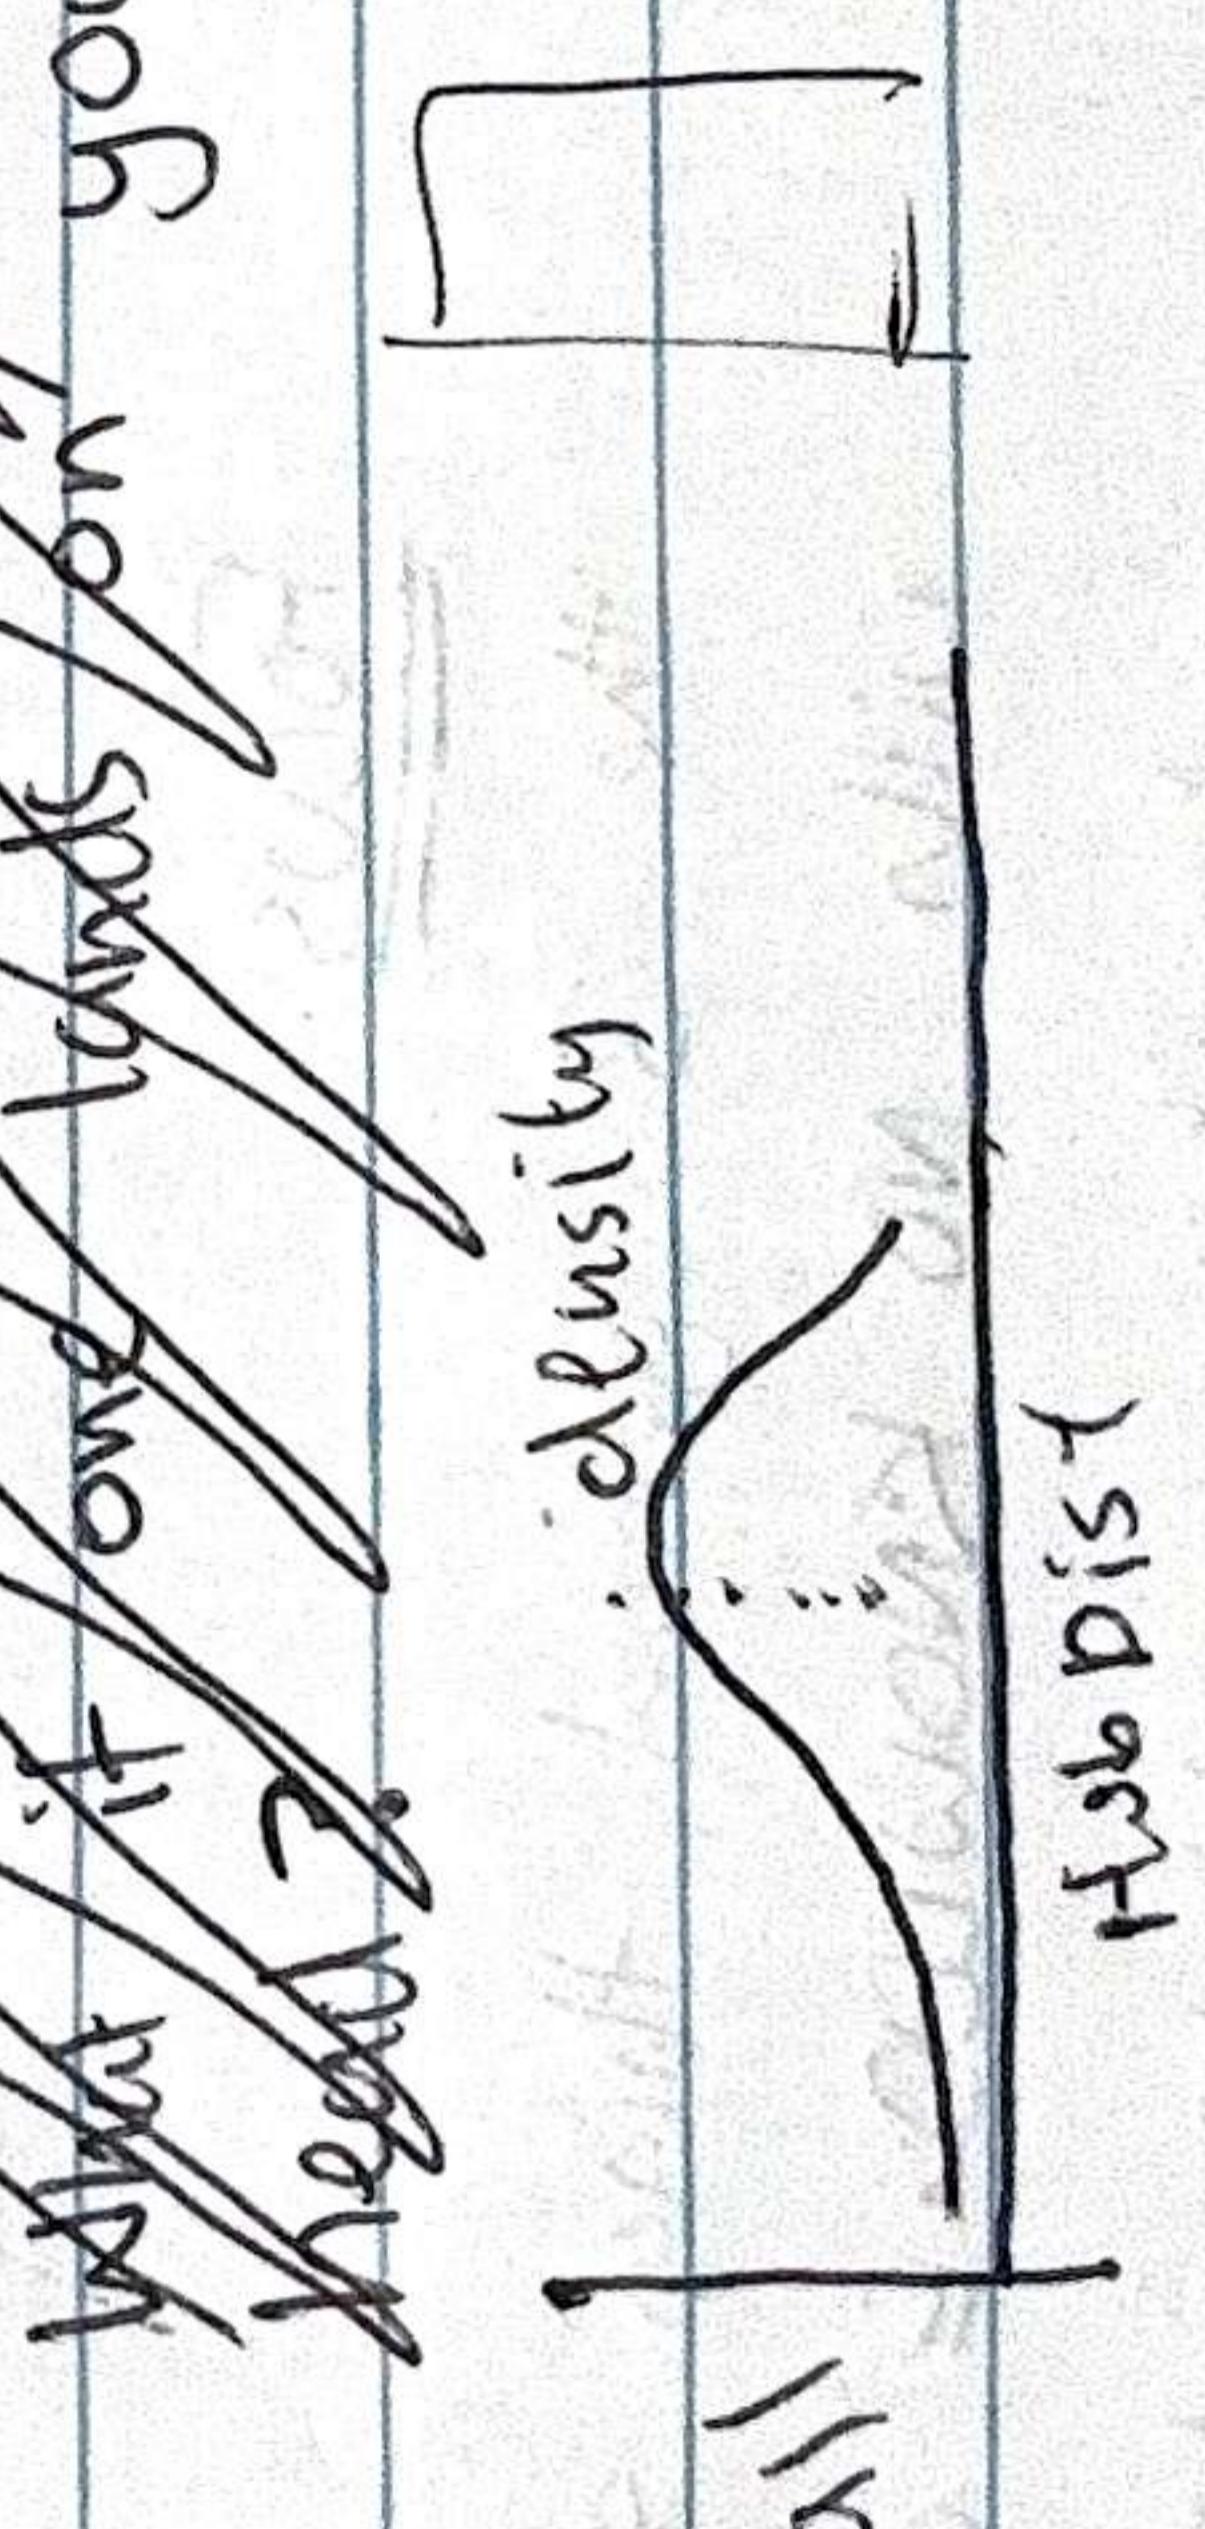

Will you ever see one?

landing sites

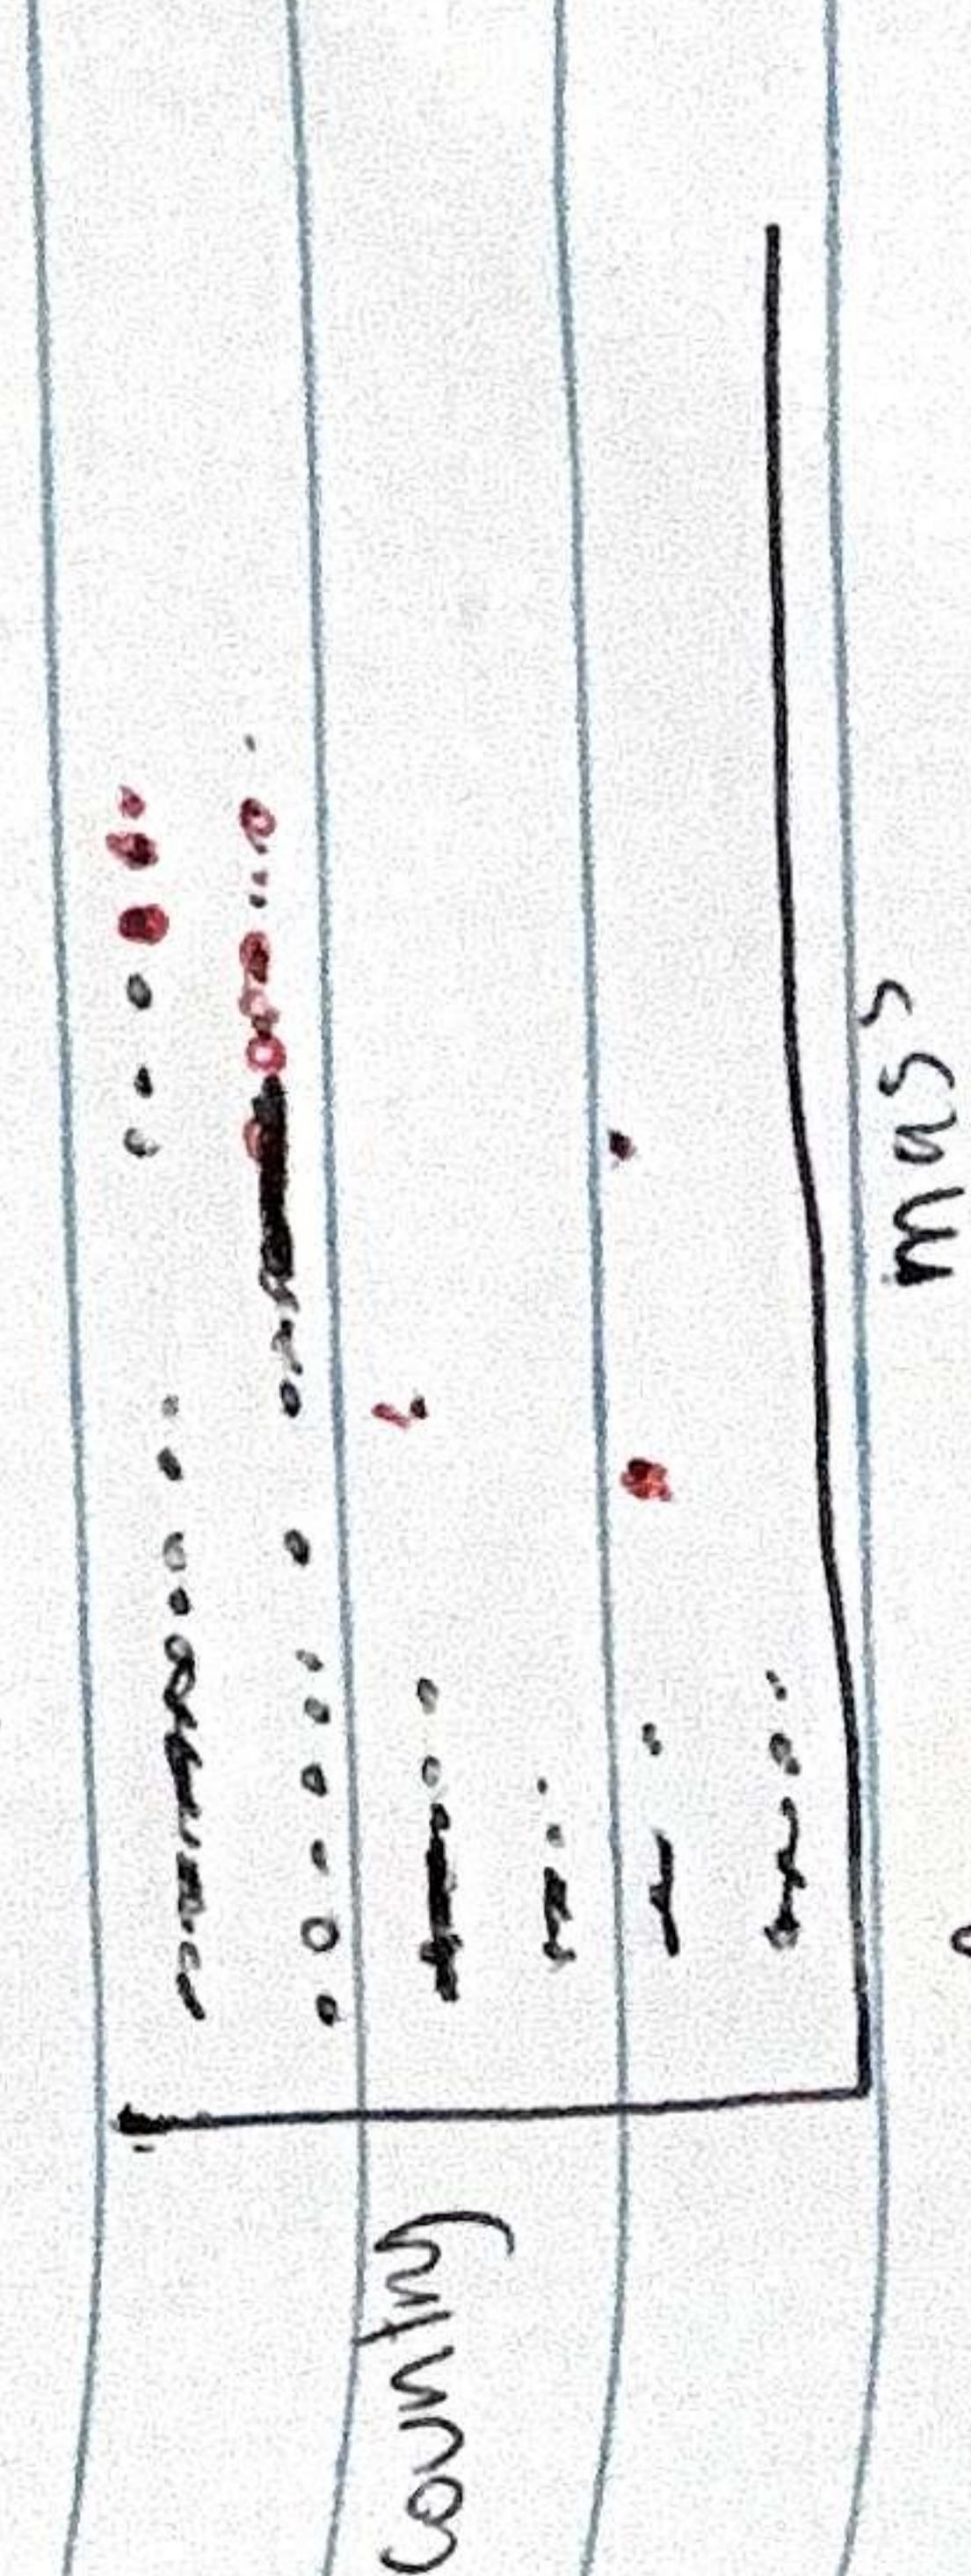

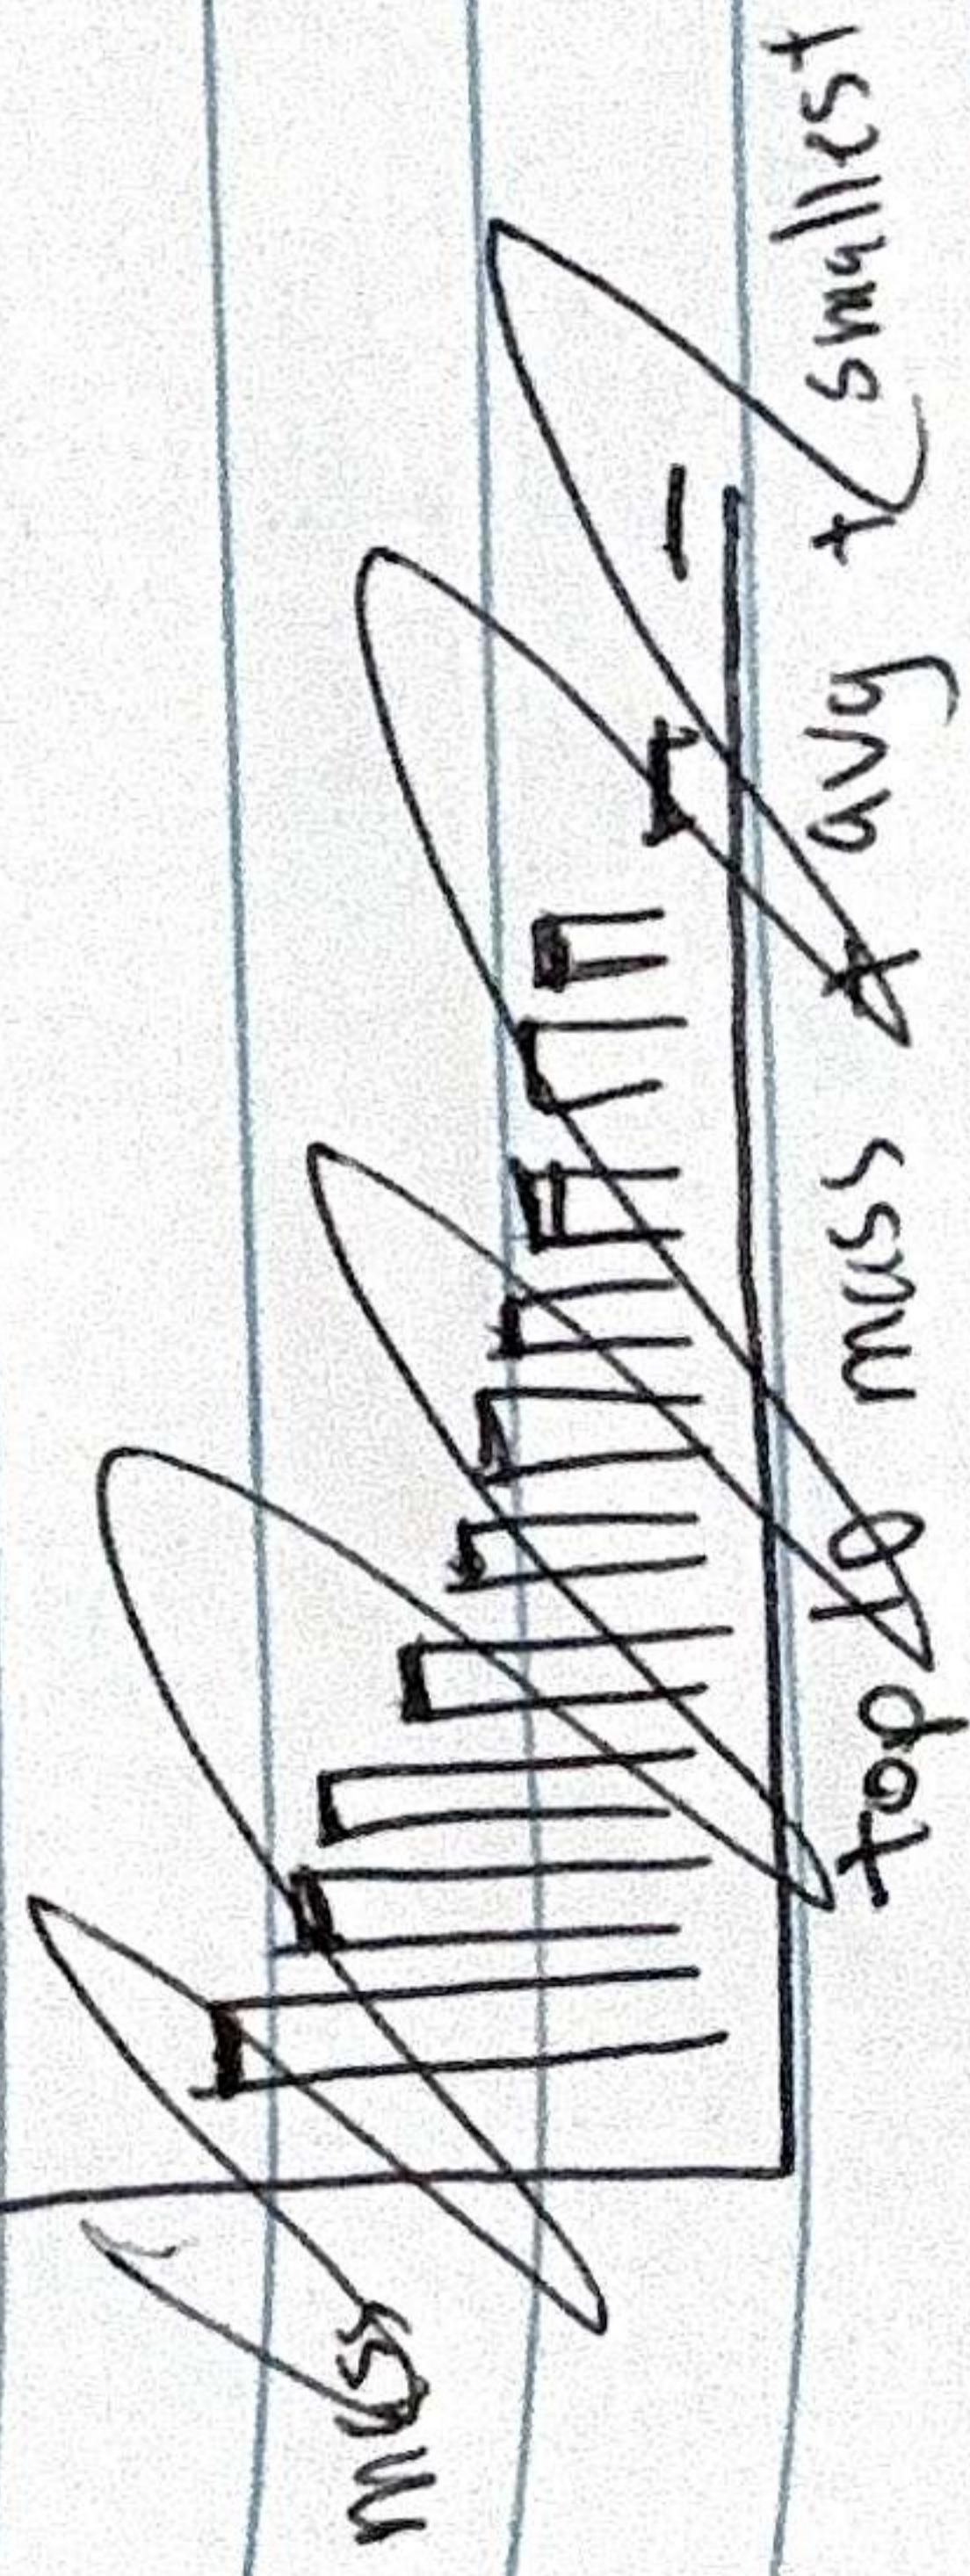

Ex

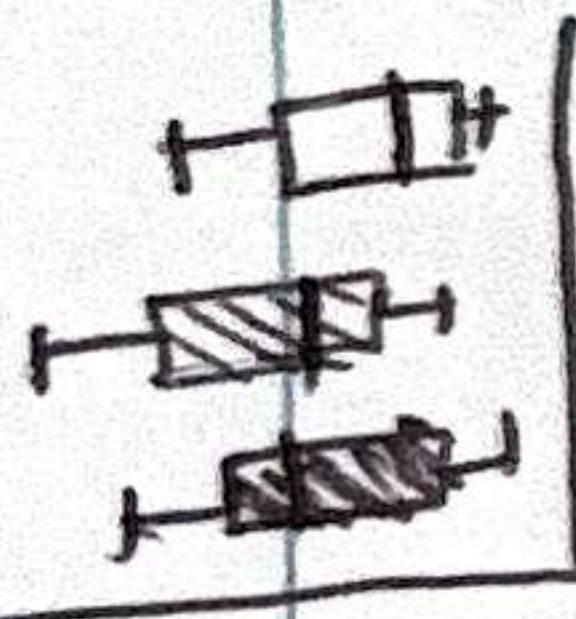

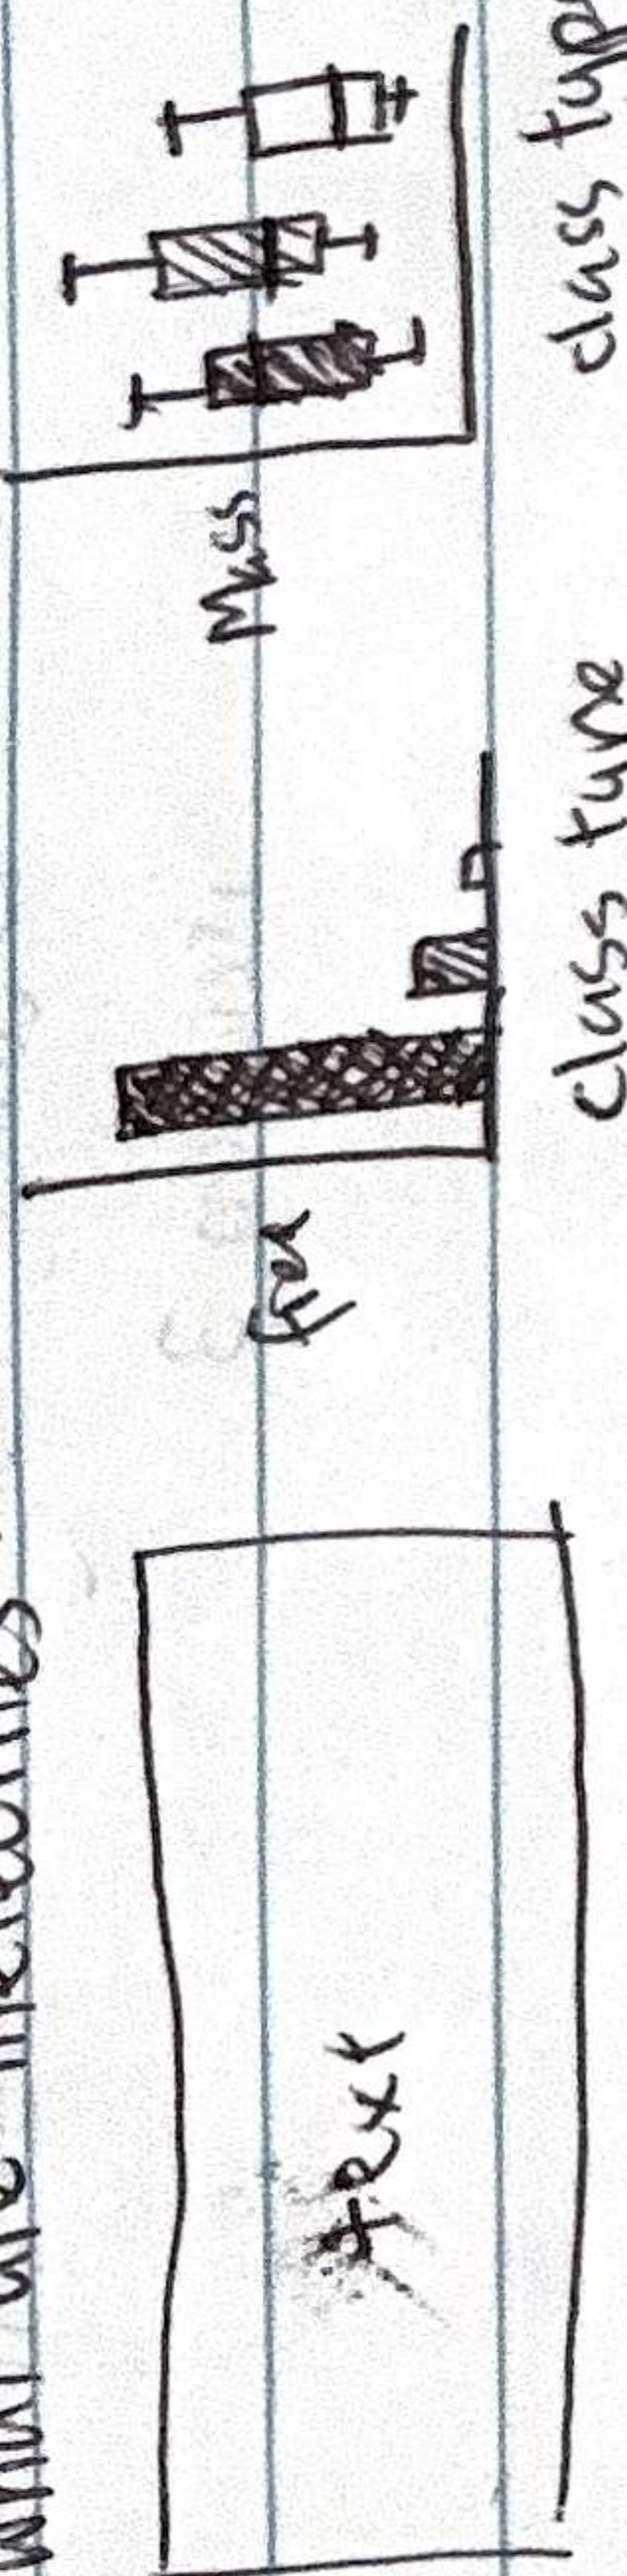

Hub dist

- ⊕ more interesting graph
- ⊖ might not be as effective in combining data

Sheet #5

What are meteorites?

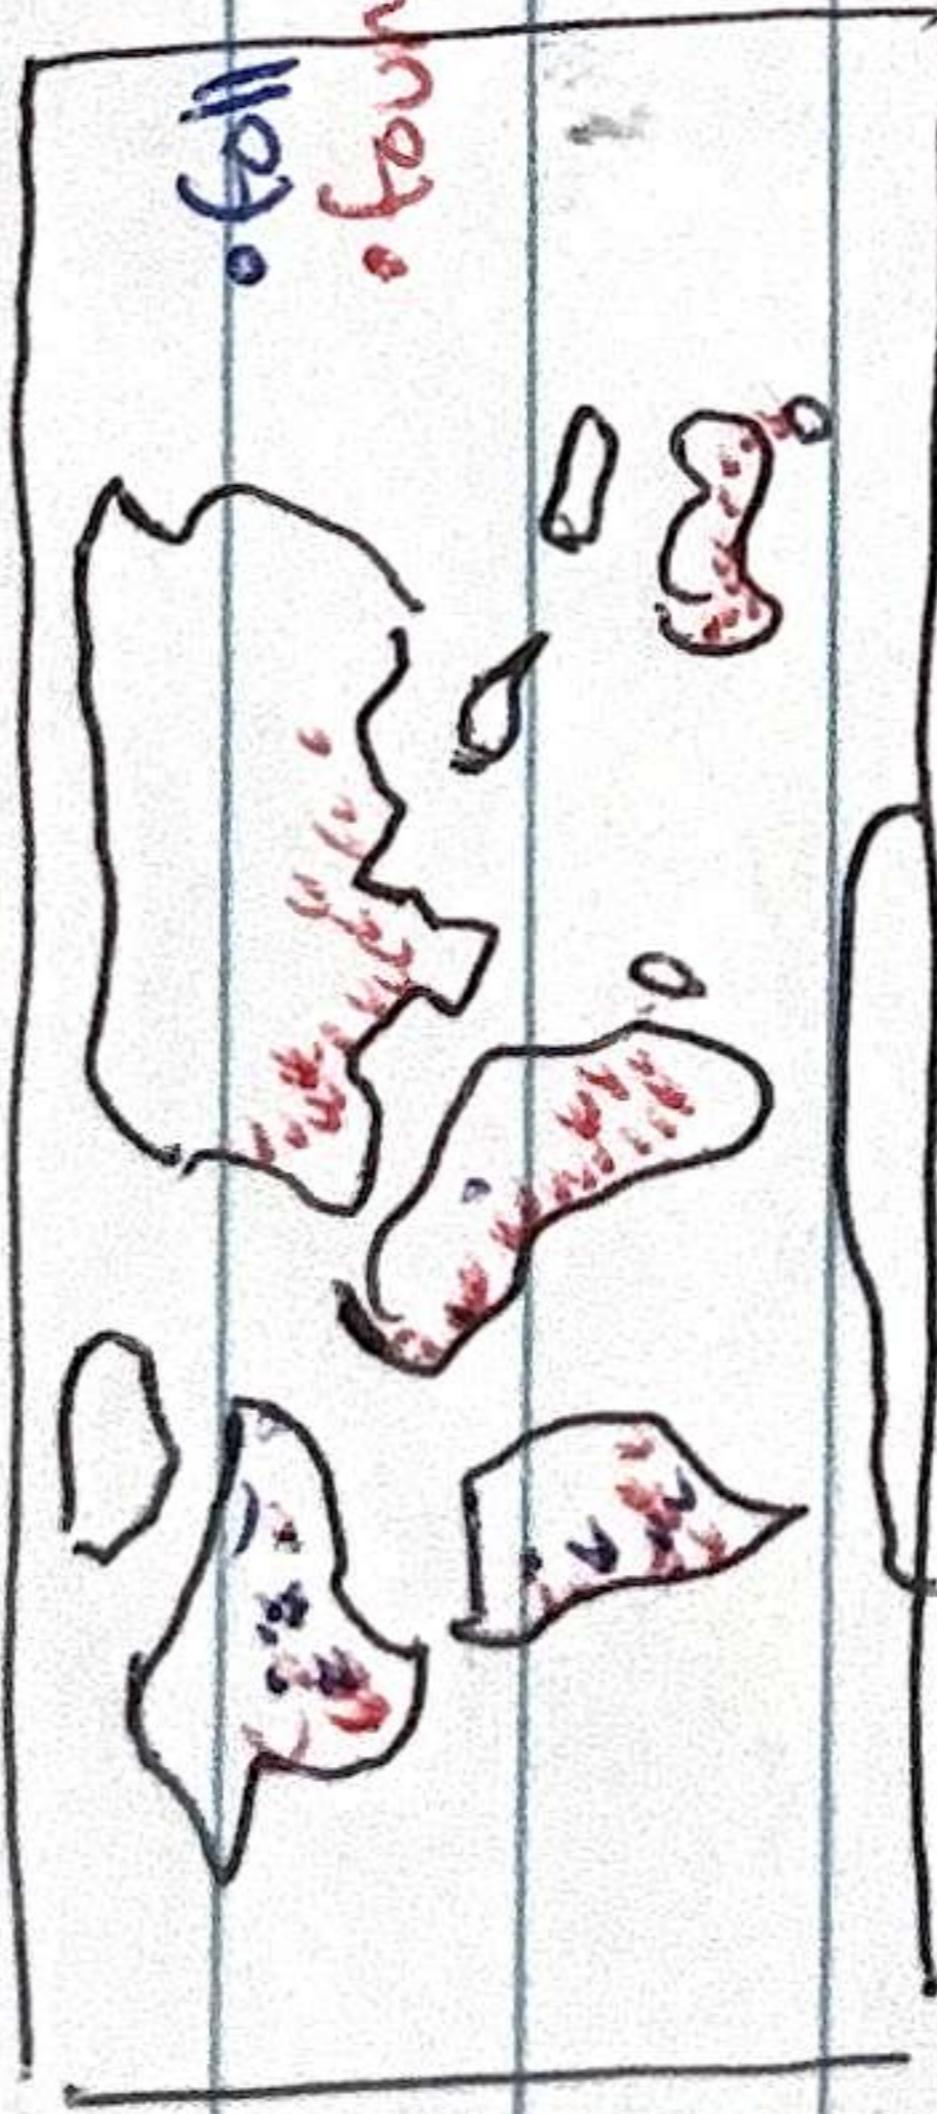

class type

class type

Meteorite Landings

density

distance

estimated 2 weeks to create.

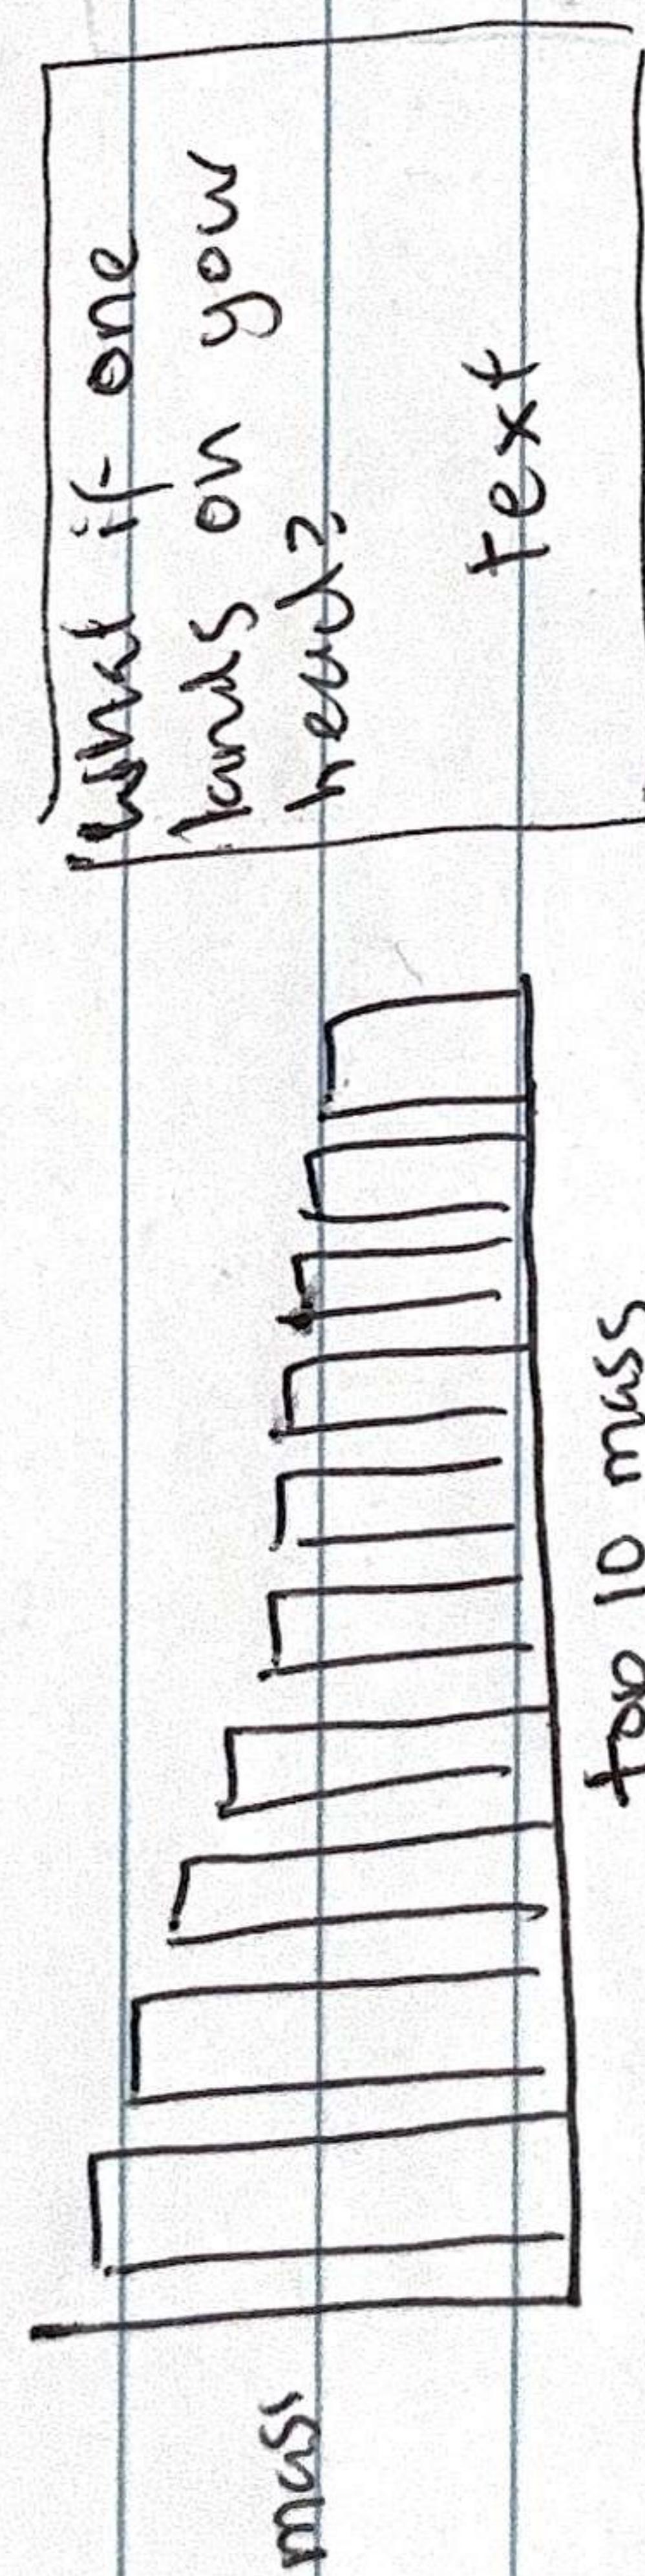

Details

using visual studio code

- ↳ html, css, javascript
- ↳ On computer displayed on the web via GitHub

OPERATIONS

Last chart can sort by country

FOCUS

The 3 general things someone with NO KNOWLEDGE on meteorites might be interested in to keep reading, top to bottom.
